SIMPLE KNOWLEDGE ABOUT PLANTS

The needs of plants

Experiments

THE LEAF

Parts of the leafp.

Functions of the leaf

Chlorophyllp.

Attachment of leaves on the plantp.

Distribution of leaves on the stem of the plantp.

Evaporation / transpiration of the leafp.

Types of leavesp.

Shapes of leavesp.

Margins of leavesp.

Leaf Activitiesp.

STEM

Main function of the stemp.

Types of stemsp.

Parts and attachments of the stemp.

Placement of the budsp.

Parts of the woody stemp.

Water circulationp.

Bulbsp.

Aerial stemsp.

Erect stemsp.

Climbing stemsp.

ROOTS

Main function of the rootp.

Parts of the rootp.

Root typesp.

Varieties of wooden tap rootsp.

Physiology of plantsp.

Experimentsp.

Collaboration between tap roots and leavesp.

SEED

Main function of the seedp.

Kinds of seedsp.

Monocotyledonp.

Dicotyledonp.

Seed dispersalp.

FLOWER

Main function of the flowerp.
Parts of the flowerp.
Flower symmetryp.
Arrangement of flowersp.
Colour of the calyxp.
Types of calyxp.
Types of corollap.
Place of the ovary in the flowerp.
Syngensisp.

FRUIT

Main function of the fruitp.
Parts of the fruitp.
Kinds of fruitsp.
Types of fruitsp.
Kinds of succulent fruitsp.
Types of dry fruitsp.
Types of dehiscent dry fruitsp.
Types of indehiscent dry fruitsp.
