SIMPLE KNOWLEDGE ABOUT PLANTS

The needs of plants Experiments

THE LEAF	
Parts of the leaf	р.
Functions of the leaf	_
Chlorophyll	р.
Attachment of leaves on the plant	p.
Distribution of leaves on the stem of the plant	p.
Evaporation / transpiration of the leaf	p.
Types of leaves	p.
Shapes of leaves	p.
Margins of leaves	p.
Leaf Activities	p.
STEM	
Main function of the stem	p.
Types of stems	p.
Parts and attachments of the stem	p.
	•

Placement of the buds p. Parts of the woody stem p. Water circulation p. Bulbs p. Aerial stems p. Erect stems p. Climbing stems p.

ROOTS Main function of the rootp. Parts of the rootp. Root typesp. Varieties of wooden tap rootsp. Physiology of plantsp.

Experimentsp.
Collaboration between tap roots and leavesp.

SEED

Main function of the seed	р.
Kinds of seeds	p.
Monocotyledon	p.
Dicotyledon	p.
Seed dispersal	p.

FLOWER

1 E O W E IX	
Main function of the flower	р.
Parts of the flower	р.
Flower symmetry	р.
Arrangement of flowers	р.
Colour of the calyx	р.
Types of calyx	р.
Types of corolla	р.
Place of the ovary in the flower	р.
Syngenesis	p.
FRUIT	
FRUIT Main function of the fruit	p.
	•
Main function of the fruit	p.
Main function of the fruit Parts of the fruit Kinds of fruits	p.
Main function of the fruit Parts of the fruit	p.
Main function of the fruit Parts of the fruit Kinds of fruits Types of fruits Kinds of succulent fruits	pppp.
Main function of the fruit Parts of the fruit Kinds of fruits Types of fruits Kinds of succulent fruits Types of dry fruits	ppppp.
Main function of the fruit Parts of the fruit Kinds of fruits Types of fruits Kinds of succulent fruits Types of dry fruits	pppppp.
Main function of the fruit Parts of the fruit Kinds of fruits Types of fruits Kinds of succulent fruits	pppp.
